

STEEL ECO-FRIENDLY

BUILDING RESIDENCES

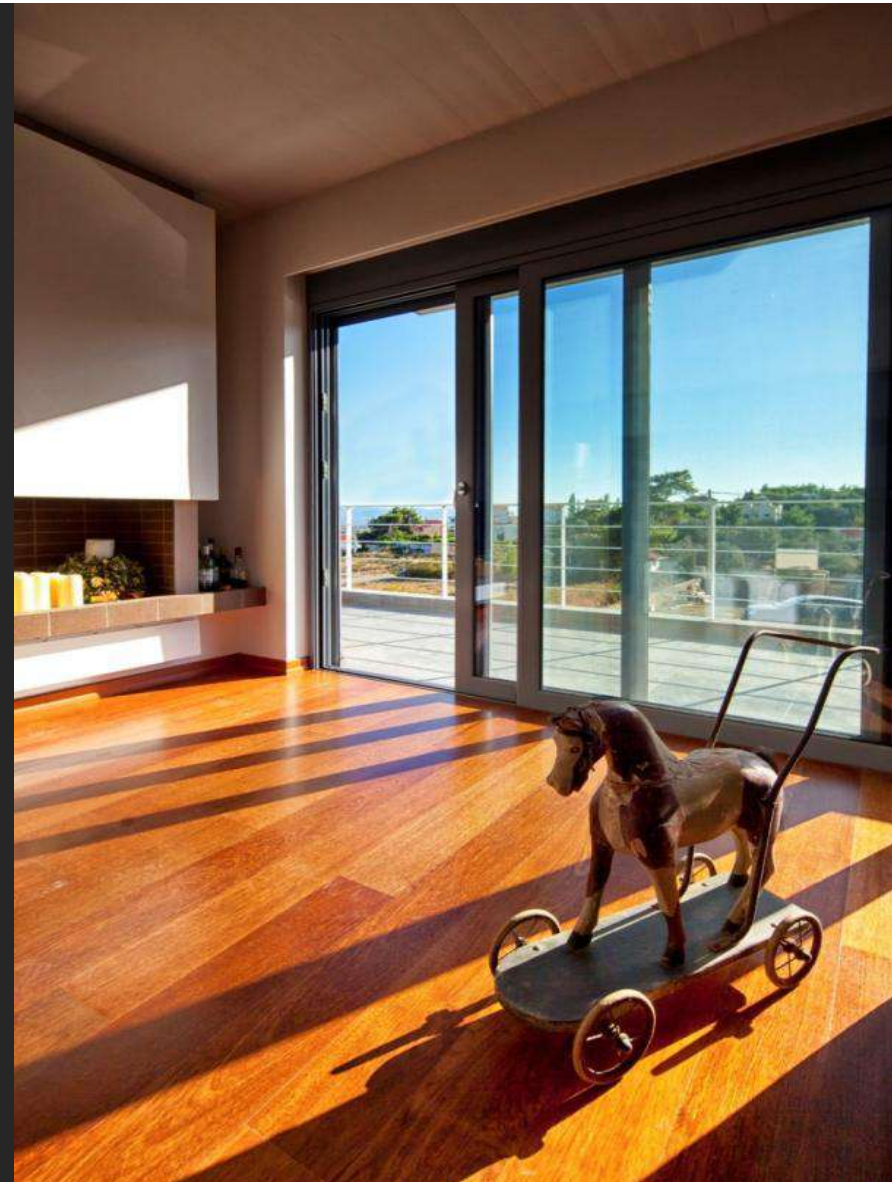

PAPAIOANNOU ENGINEERING is actively engaged in the design and construction of technical projects, focusing on quality and innovative methods.

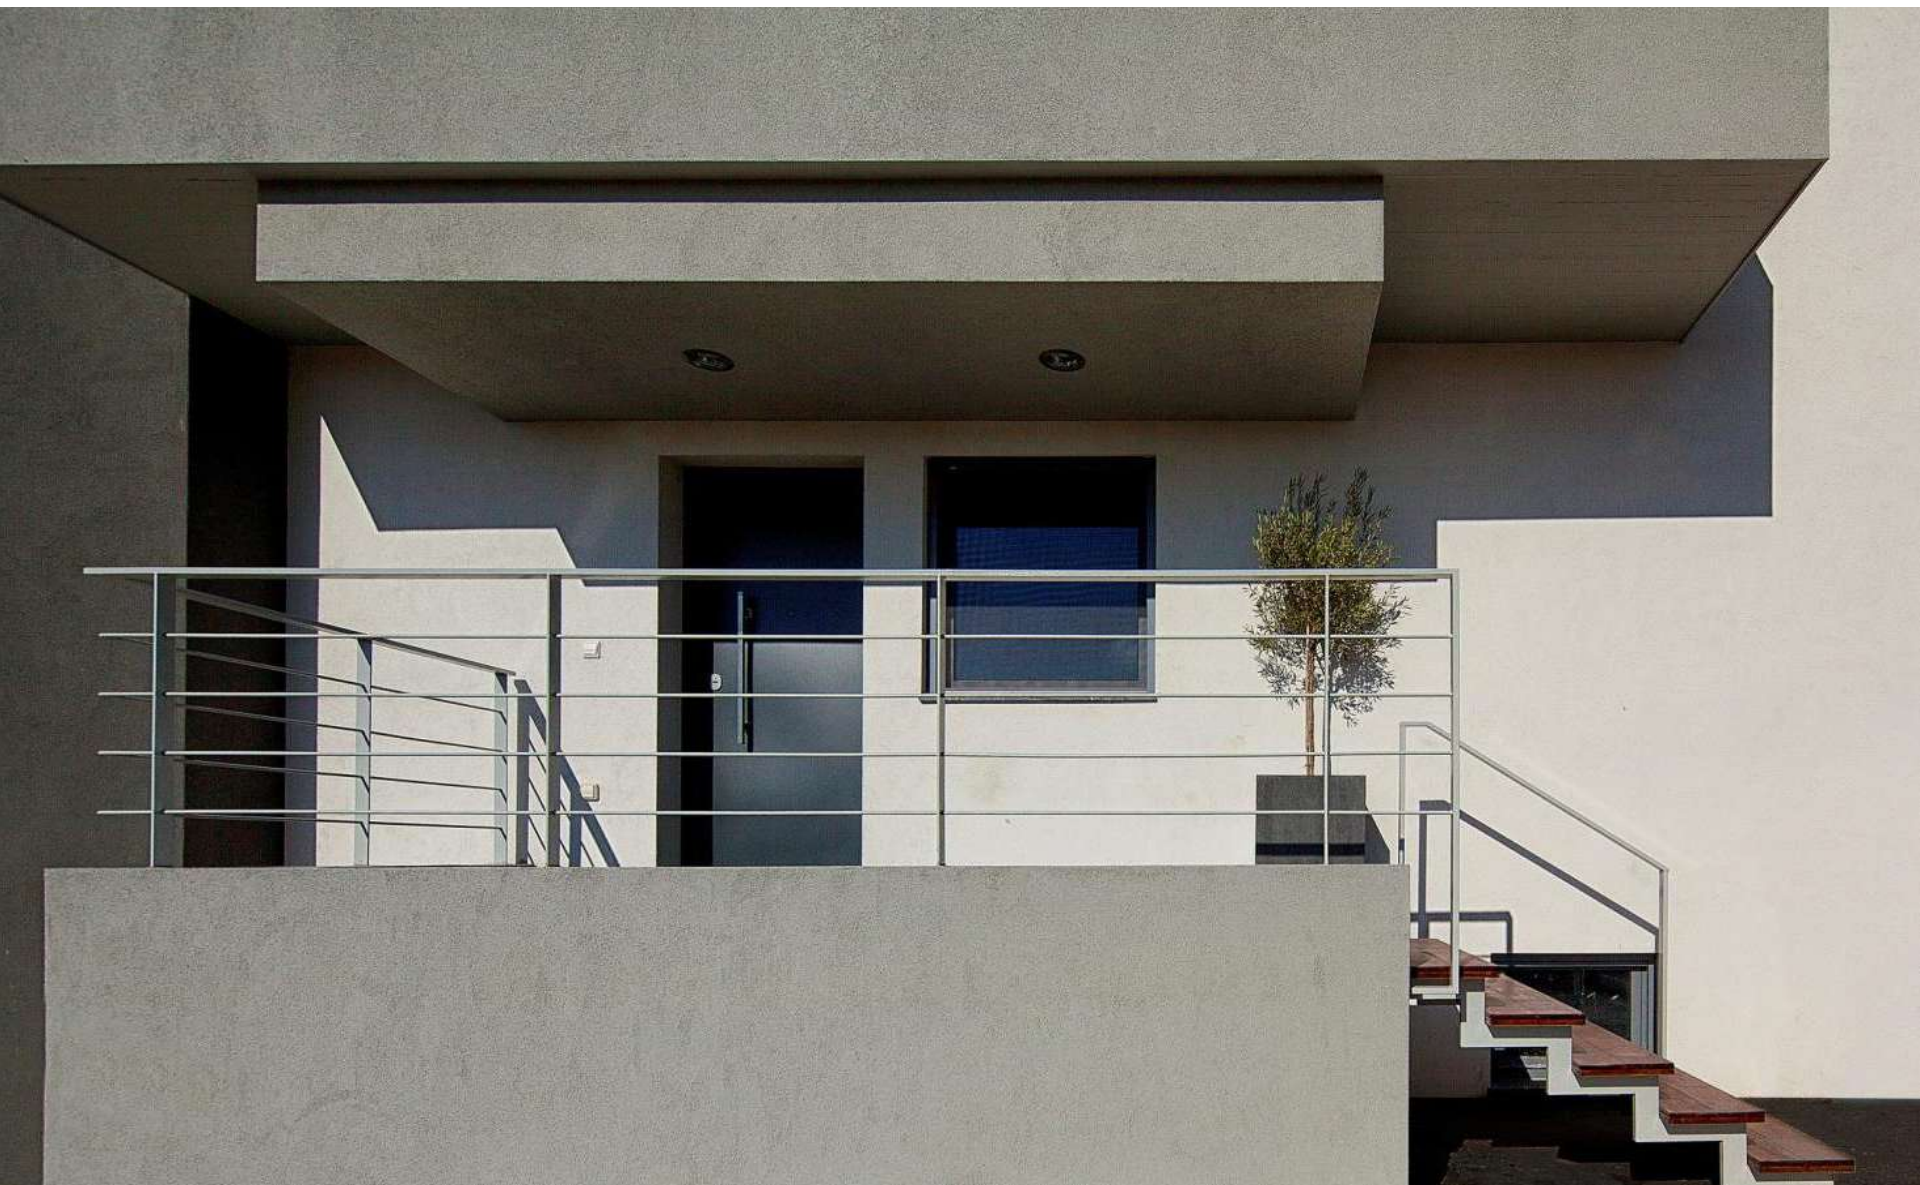

Our engineering network is staffed by highly qualified engineers with extensive experience in implementing projects of any type and scale, high technical requirements and perfect architecture.

Our wide engineering network of specialist partners provides complete design services and project management from start to turn key stage.

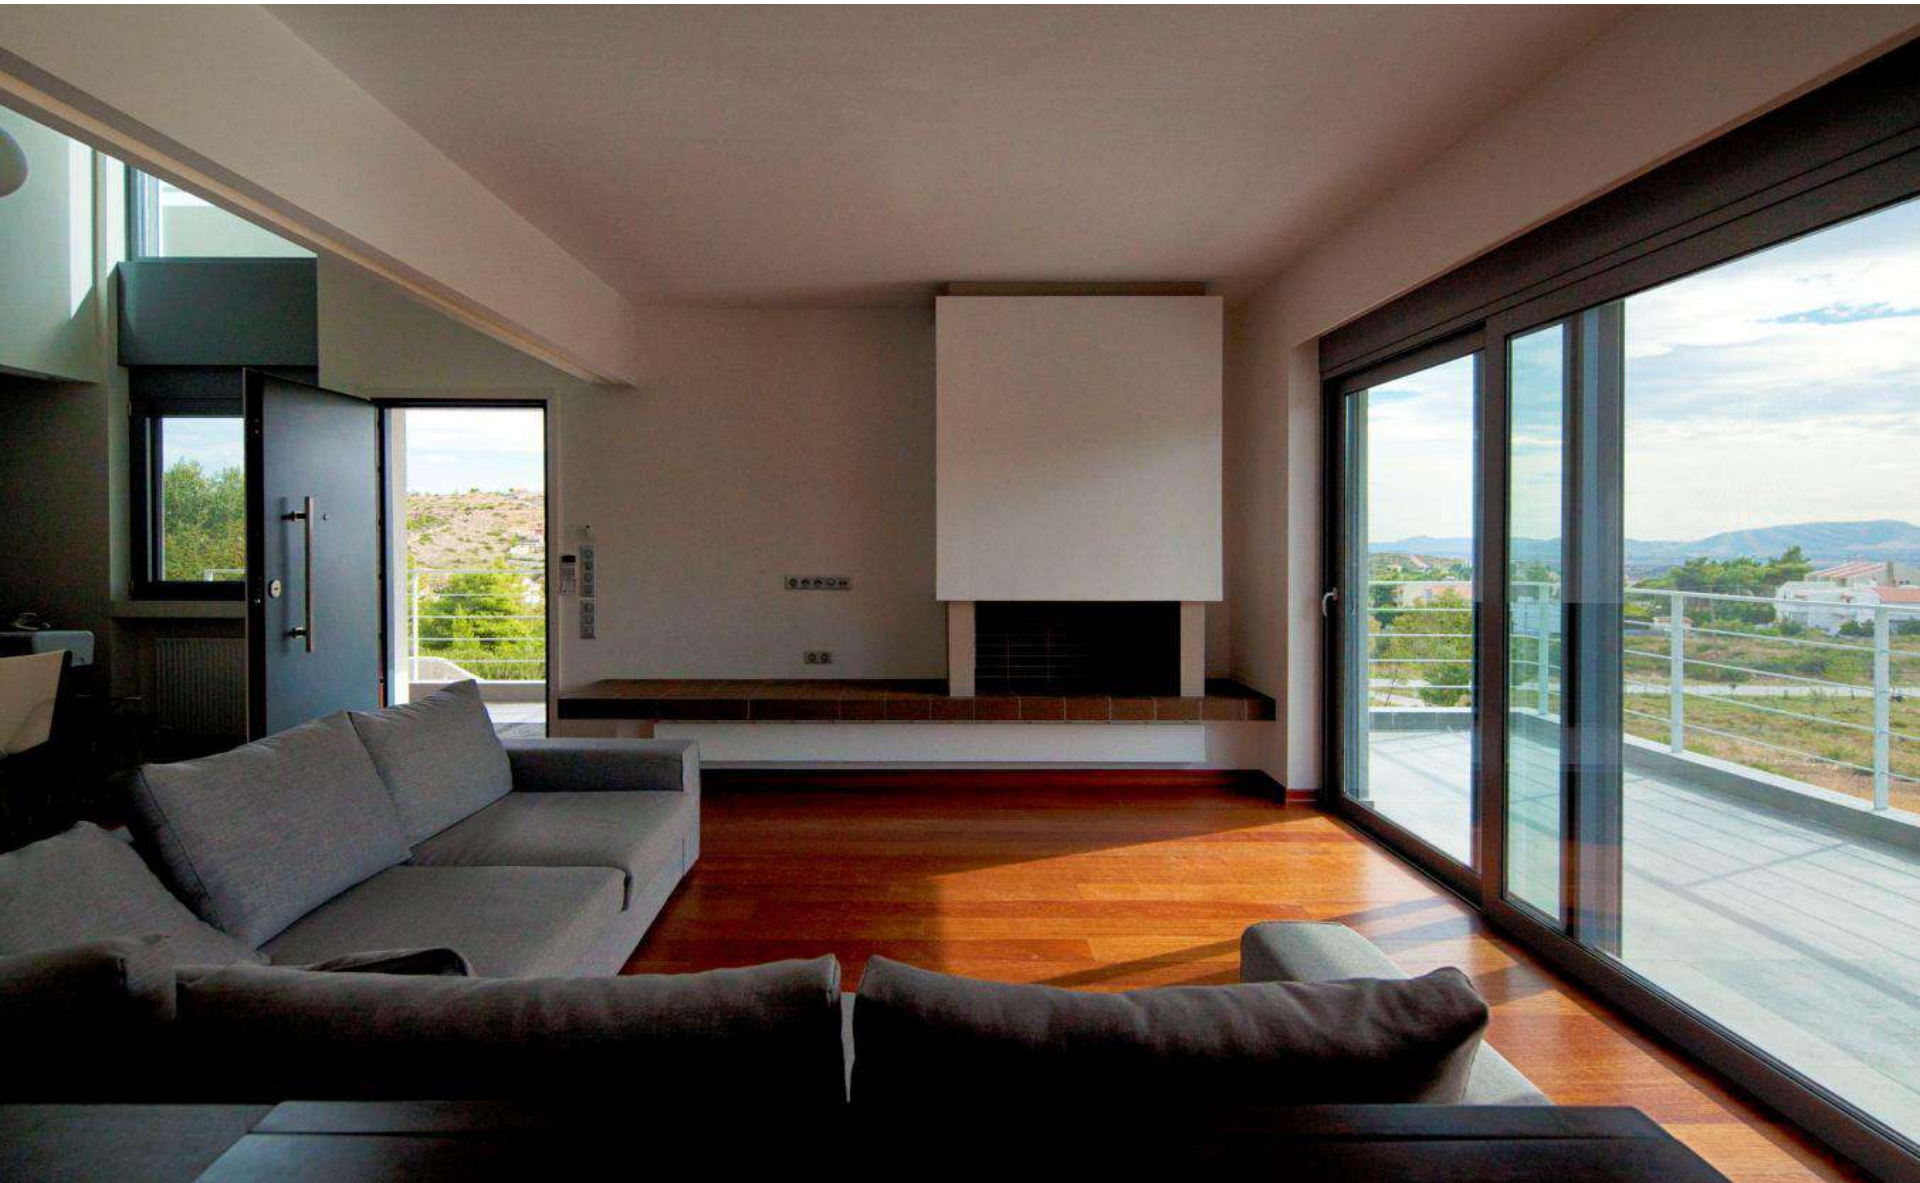

Our philosophy in practice is the step-by-step design and well organized project management, which are the keys to ensure excellent final result with attention to detail, without time deviations and also at very competitive prices.

We like to design and build the place you live and you will work in the future.
